I am a highly motivated front-end developer with a background in business and team management, marketing and merchandising. Working in teams my whole life I learned that I shine most in the role of executive or implementor.

My INTJ-A aka "The Architect" personality and idealistic view of the world around me combined with optimistic nature push me towards achieving the impossible.

The idea of doing something half-way is very unsettling to me, I was raised with the belief that if you do not plan to do something right, then you shouldn't do it at all.

Life, work and school taught me that being a good person should be everyone's priority.

WORK EXPERIENCE

FARMER'S ASSISTENT

I/S Størsbølgård

Most of the efforts are directed towards the profitability markers and wellbeing of the animals. The markers are the milk yield, the insemination effectivity and the cell count levels.

My work resulted in the following:

- milk yield rose from 28 to 33kg on average a day, topping 10000kg a year;
- cow numbers increase from 250 to 550 cows;
- heifer numbers increase from 200 to 700, selling them for export becoming a new source of profit;
- the cell count drops from 340 to 140, providing a 2% bonus from the buyer.

DEPARTMENT STORE MANAGER

Altex Romania

Great user experience is the one thing that can make a store successful when others fail. To achieve it as a manager and member of the sales force, I strived to be an example to be followed.

Daily focus fell on:

- shop environment;
- customer needs and requests;
- financial and stock reports;

Best results:

- achieving 95% off all monthly sale goals;
- increasing the anual sales from 1 to 2.5mil€;
- staying 5% over the market growth;

HOBBYS
